

PROCEDURES FOR SICKNESS RELATED TO A NON-INJURY RELATED ILLNESS

The following are recommended guidelines for coaches, Safety Officers, parents and guardians for participants who are sick or showing symptoms of COVID-19. It is important to remember that public health authorities and advice from physicians must be followed in any situation where a participant is sick.

Note that the procedures below apply to non-injury related illness and all other return to play guidelines specific to injuries still apply.

PARTICIPANT FEELS ILL AT THE FACILITY/ACTIVITY

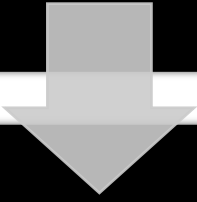

Participant advises team staff/Safety Officer immediately.

Participant receives a mask and wears immediately. Anyone caring for the participant should also wear a mask.

Parents/guardians are advised and take the participant home. If the participant is an adult, they will leave immediately if well enough to drive. If there is a delay in leaving the facility, they should find an area to isolate.

Contact a physician and call the local public health line. Follow isolation requirements of public health authorities. The participant will require a note from their physician to return to activity.

Participant advises Team staff they are not feeling well or have symptoms of COVID-19 and will not be attending.

Participant is advised to follow up with their physician or public health authority for instructions. They will require a note from their physician to return to activity.

Any participant with suspected or confirmed COVID-19 should not return to ringette until all public health authority steps have been completed. They will require a note from their physician to return to activity.

If a participant is confirmed to have COVID-19, refer to the section regarding positive testing communication.

POSITIVE TEST OF COVID-19

Important!

If a sick participant (or their parent/guardian, if the participant is a minor) elects to inform a team/ringette association that they have been diagnosed with COVID-19, the individual informed shall seek the sick participant/their guardian's consent to contact public health authorities in order to obtain advice on communication with other potentially impacted participants. The sick participant (or their parent/guardian if the participant is a minor) should be asked to advise Public Health of this consent.

Explain the communication will take place and NEVER disclose the sick person's name.

**ANY RINGETTE PARTICIPANT (PLAYER, VOLUNTEER, TEAMS STAFF, OFFICIAL OR PARENT) TESTS POSITIVE FOR COVID19 AND CONTACTS THEIR PHYSICIAN
FOLLOW PUBLIC HEALTH GUIDELINES**

Immediate removal from ringette for anyone in the home.

Report to public health authorities following their guidelines.

Public health authority determines communication protocol and tracing of all contacts. Cooperate on any necessary communication.

Note required from a physician or public health authority to return to play.

In Canada, the management of public health crises is a matter involving close coordination between all levels of government. There is therefore a variety of public and private sector privacy legislation at the federal, provincial and territorial levels that govern the collection, use and disclosure of personal information. There are provincial and territorial privacy authorities that oversee compliance with the [privacy legislation](#) at the federal, provincial and territorial levels that govern the collection, use and disclosure of personal information. There are provincial and territorial privacy authorities that oversee compliance with the privacy legislation in their respective jurisdictions, and some have [published their own statements](#) relevant to the matter of COVID-19.
